

## AI Leadership Advisory

Establishing an AI leadership for the country

### AUDIENCE

Official Government Representatives

### CHALLENGE

Artificial Intelligence will become the most powerful instrument of the new Innovations Age. It will not only be used in the IT space but will be the key driver for all other industries – with not a single exception. All industries will make use of AI for research, evaluate, predict, form, iterate through options like no human can. Similar to the development of machines in the 1800's who could melt steel, bend metal, lift tons of concrete, cut through material and so forth like no human could.

### ADVISORY

- \* Individual advice for gov. officers
- \* Exploring consequences of AI
- \* Exploring individual opportunities
- \* Discussing prerequisites to engage
- \* Considering current advantages
- \* Evaluating resources and partnerships
- \* Collaboration with universities
- \* Creating an internal brain trust
- \* More possible initiatives
