THE CONCEPT

We do not take any equity. We are not influenced or sponsored by any industry or corporate. We are a non-profit organization. We work with you over a 12-week timeframe with top successful entrepreneurs on each and every strategic aspect of your business to make it a stellar company. 12 weeks later you are ready to ramp revenue, hire top talents and get the funding you need. We will accompany our graduates for the next 7 or so years all the way to an IPO! It's the toughest accelerator in the world.

PURPOSE

Helping top innovative entrepreneurs in emerging or developing countries to build, what entrepreneurs before you did in developed countries. Creating signature companies like Intel, Mercedes, Credit Suisse, Samsung and others. We provide entrepreneurs with the same drill that our founders experienced in 20 years Silicon Valley.
