THE CONCEPT

You learn what our leadership team learn when they arrived in Palo Alto or in recent years in San Francisco – no matter where we came from: Survive and quickly succeed in a matter of a few weeks.

You learn to build a company faster than you can think and be in the market 6 months later. You learn to think differently, set your mind and with that, making the impossible a new reality.

2 days physical workshop in one of our locations, followed by 2 weeks online.
