

Global AI Safety Carta

Forming AI Safety, security & ethics policies globally

AUDIENCE

Official Government Representatives

CHALLENGE

Artificial Intelligence security, safety as well as operations ethics, create rightfully major concerns of the general public. While today most countries work on their own concepts, given the complexity of the topic and potential threats are global or even between nations, it is highly recommended to collaborate on government level very early on to address potential conflicts even between nations, in particular those with AI know how and those who become potentially victims of the technology.

ACTIVITIES

- * Building an international workgroup
- * Having three officers from each country
- * Formulating a Global AI Safety Carta
- * Exchanging technology development
- * Working on system safety aspects, protecting all living things and assets
- * Working on security aspects, protecting systems and their operation themselves
- * Working operational ethics across borders, societies and cultures
- * More possible initiatives
