

INVESTOR

Financing Groundbreaking Innovation

Innovation Capital Network (ICN)

*Carefully selected, investment opportunities:
Highly innovative businesses from around the world.*

Helping highly innovative businesses from fast-growing startups to midmarket or small enterprises get funding through Foreign Direct Investments. Since the vast majority of nations do not have any robust and trusted FDI policies or stable local capital markets, we help companies register their HQ in Singapore to attract foreign investors.

Program Activities

Investor Education

We free investor webinars to help create or optimize your investment strategy. The core experiences of this program come from some of the best Silicon Valley investors.

Co-Investor Search

If you have already invested in a great company and are looking for co-investors for the next round; we are more than happy to share your opportunity with our investor network in our next investor letters.

Deal Flow

We offer deal flow from innovative companies as they surface. We complete a due diligence check before we share it.

Audience

Accredited investors who are interested in combining their investment interest in innovative businesses with helping emerging countries get out of poverty.

Investor Exchange

As you get to know other investors through co-investments or the community, you can network, compare notes, share insights and experiences.

Investor Network Expansion

We have access to over 900 investors, including Angel Investors, Angel Groups, VCs, and Private Equity investors from around the world. We are always looking to expand our network and give innovative businesses more opportunities to get funded.

Unifying International Investment Regulations & Support

The ICN eliminates three major obstacles when investing internationally by:

Unifying Investment Contracts

We ask all companies we support to register their business in or transfer their HQ too, Singapore. Companies create unified stock purchase agreements that make investments transparent and easy. All contracts are in English and all legal aspects are documented in English. Companies may still operate in their original nation and pay taxes in their nation. However, the ownership and IP are regulated in Singapore and so are all the investor rights.

Sharing Investment Strategies

The way people invest ranges from "spending" some money and hoping it will work out – all the way to having firm investment strategies, well-developed due diligence processes and a clearly defined idea of how to support the young entrepreneurs from start to IPO. We work with all our members to develop an investment strategy that allows investors to understand the dynamics of the young and fast-growing business.

Breaking Language Barriers

Highly potential countries with very interesting companies are often ruled by local laws in local languages, making investments nearly impossible or at least highly unattractive. By having the Headquarters in Singapore, all communications, all contracts, all potential legal disputes are handled in English. We see fluency in English not required to deal with investors but we believe it imperative for companies to be successful in the global market. Therefore, WIForum exclusively works with companies that speak fluent English.

How to join the ICN

Requirements:

- You are an accredited investor (or equivalent)
- You have already invested in fast-growing companies or SMEs
- You live in a country that allows you to invest in foreign countries
- You are a full member of the World Innovations Forum Foundation

About WIForum

The World Innovations Forum Foundation (WIForum) is a Swiss-based non-profit organization, founded by entrepreneurs for entrepreneurs.

The organization is leveraging the digital space to the max., by being a global exchange for innovative minds. It is a conscious transformation from physical to digital in an expanded social online world. Members from all corners of the earth can exchange with everybody else – any time. Digital exchange, digital alliance-building, online mentorship, global investments, worldwide market access, is just the surface of the structure. The set culture of the forum is its inner value. No idea is too crazy, no project too bold, no question too dumb and no dream is too far fetched. Everything is possible and even the sky is no longer the limit. That spirit is transcending globally and no longer bound to any physical location.

To visit the global space, no passport is needed, no travel is required. All it takes is a membership and an internet connection.

The founders of the World Innovations Forum envision a world in which prosperity is possible for all nations through innovation and entrepreneurship.
